The Particle Technology Group, a research group within the department of mechanical engineering, is currently offering a position as

**Research Assistant (m/f)**
*(pay scale 13 TV-L)*

The successful candidate will work in a fixed term research project with up to 100% of a full-time employment for one year with a possibility of extension. The position includes the opportunity to pursue a PhD.

Our dynamic, interdisciplinary team focuses its research on disperse systems within the field of process engineering. The project is part of our efforts in the field of selective laser sintering.

The successful candidate will hold a master’s degree in either process engineering, chemical engineering or similar. To increase our interdisciplinary expertise, we are also interested in candidates holding a master’s degree in physics or material science. Knowledge or experience in the fields of particle technology or additive manufacturing are advantageous but not required.

Furthermore, we expect any candidate to be able to think both analytically and creatively as well as work independently and self-motivated. The ability to cooperate within the research group and with external partners is essential for our success.

Fluency in English is a prerequisite.

Women are explicitly encouraged to apply and will be considered in accordance with German law (LGG). Part-time employment is possible. Furthermore, severely handicapped persons and equivalent as per German law (SGB IX) are encouraged to apply.

For further information, Prof. Schmid is available via E-Mail or +49 5251 60 2404.

Please include the reference number 2492 in your application and send it to:
