The recommended vaccinations are usually very well tolerated. For legal reasons we still have to inform you about possible side effects. Please read the information sheet linked in the e-mail carefully before the vaccination. We would like to mention the possible local and general reactions (e.g. pain, redness, swelling at the injection site, discomfort, fever, headache), possible vascular damage and allergic reactions that can be life-threatening.

I have given all information to the best of my knowledge. I have been informed about possible side effects, I have no further questions and I agree to the flu vaccination.
