

Paderborn University is a high-performance and internationally oriented university with approximately 20,000 students. Within interdisciplinary teams, we undertake forward-looking research, design innovative teaching concepts and actively transfer knowledge into society. As an important research and cooperation partner, the university also shapes regional development strategies. We offer our more than 2,600 employees in research, teaching, technology and administration a lively, family-friendly, equal opportunity environment, a lean management structure and diverse opportunities.

Join us to invent the future!

Within the **Faculty of Natural Sciences**, the Department of Chemistry conducts research on **energy-related sciences and sustainable chemistry**. The **Steinrück group** (www.chemie.upb.de/steinrueck) is interested in electrochemistry, energy storage, desalination, interfaces, and synchrotron techniques. In this context, we offer the following positions within the framework of a Horizon Europe project (OPINCHARGE) (starting as soon as possible):

PhD student and/or postdoctoral fellow (f/m/d)

(Salary level 13 TV-L)

The positions (50% and/or 100% regular working time) entails a fixed-term contract. The position is initially limited to three years due to third-party funding within the scope of the Wissenschaftszeitvertragsgesetz (WissZeitVG). The duration of the fixed term generally corresponds to the approved project duration of three years. The possibility to graduate as a PhD is provided.

Position Profile:

- Operando X-ray studies of electrochemical interfaces for Li-ion batteries.
- Development of high-throughput and sub-second operando interface-sensitive X-ray scattering.
- Investigations of electrochemical interfaces and interphases using thin film model electrodes.
- Organization of and participation in synchrotron beam times.
- Publication of the acquired results in scientific journals.
- Teaching of up to 2 hours (at 50%) or 4 hours (100%) per week.

Your profile:

- Excellent Master's (at 50%) or PhD (at 100%) degree in chemistry, physics or a closely related, relevant subject.
- Background in at least one of the following fields:
 - Structural characterization of matter (e.g., X-ray diffraction, X-ray spectroscopy, X-ray microscopy).
 - Fabrication of electrodes for electrochemical systems.
 - Electrochemical measurement methods.
 - Programming languages (e.g., Python).

Paderborn University is a family-friendly university and supports its employees with the compatibility of career and family. We make personnel decisions based on qualifications, skills, and academic achievements. Applications from women are particularly welcome and, in case of equal qualifications and experience, will receive preferential treatment according to state law (LGG). Part-time employment is generally possible. Qualified disabled people (in the sense of the German social law SGB IX) are also encouraged to apply.

For further information please contact Jun. Prof. Dr. Hans-Georg Steinrück.

Please send your application AS A SINGLE PDF FILE in German or English to hans.georg.steinrueck@uni-paderborn.de referring to the **reference no. 5728**.
